

Microsoft launches an exciting FREE* initiative to help customers identify, unlock, and capture the business value of Office System solutions called Business Value Planning Services (BVPS).

June 15, 2009 – AccessIG, a leading Business Improvement Solutions provider for over 30 years, is proud to announce itself as a newly certified Microsoft Business Value Planning Services partner, and wants to make you aware of this great new offering.

BVPS is designed to help customer Business Decision Makers (BDMs) develop a plan to leverage the strategic value of the Microsoft Information Worker (IW) platform by improving an impactful business process, working with the customer to document, analyze, optimize, justify, sequence, and propose a plan to improve their business using Office Systems.

As a qualified Microsoft BVPS provider we will share best practices, analyze your organizational environment, and provide tools and services that help you get the most out of your investment in IW technologies.

Companies can take advantage of their Software Assurance benefits to develop a plan to leverage the strategic value of their Microsoft Office System. The BVPS methodology provides a reliable, repeatable process to conduct, and be compensated for 3, 5, 10 or 15-day engagements according to the level of the customers' Software Assurance benefits. As a certified Microsoft BVPS provider, we will share best practices, analyze our customer's organizational environment, and provide tools and services that help get the most out of your investment in Microsoft technologies.

"This accreditation is a natural extension of our core competency as a Business Improvement Solution developer on Microsoft technologies. Combining the BVPS methodology with our 30 years of business experience and Microsoft certified technical skills, AccessIG will help companies leverage their existing software investments using services paid for by Microsoft," said Ed Murphy, President.

Packaged Services, as a benefit of Software Assurance, can be paid for using vouchers that Microsoft supplies, giving companies the ability to engage service providers without having to draw from a departmental budget. Customers can use the vouchers for:

- Consulting
- Implementation and Configuration
- Training

As a Microsoft Certified Partner, with software solutions developed in Windows SharePoint Services, Microsoft Office SharePoint Server, and Microsoft Office 2007, AccessIG has the business and technical experience to help companies take advantage of the Microsoft software licenses they want to deploy, through the Business Value Planning Services program, as a benefit of the Software Assurance program. Please contact us by phone to learn how Microsoft will pay for your Microsoft Office consulting, implementing, configuring and training needs.

Contact AccessIG at: sales@accessig.com or David Foss at 973-360-0750 X115.

** Microsoft customers can use their existing Software Assurance packaged service vouchers to pay for the service.*
